

PROFESSIONAL SUMMARY

Frontend-focused Full Stack Developer with approximately 4 years of hands-on experience in building scalable and performance-oriented web applications using React, Next.js, Node.js, MongoDB, SQL, and core DBMS concepts. Strong expertise in designing modular, reusable, and maintainable UI architectures with a focus on high code quality, clean structure, and best development practices. Experienced in developing responsive and dynamic user interfaces, integrating RESTful APIs, and managing efficient state handling in complex applications. Adept at translating business requirements into technical solutions while ensuring performance optimization, code maintainability, and scalable system design across full-stack environments.

PROFESSIONAL EXPERIENCE

Sentientgeeks - Junior Software Engineer

Kolkata

02/2024 - Current

- Developed an optimized, event-driven user interface for a trade-focused business management platform, ensuring improved performance, usability, and scalability.
- Built a real-time chat application leveraging SignalR, implementing full-duplex client-server communication through WebSocket technology.
- Gained expertise in JWT-based authentication and authorization mechanisms, ensuring secure user access and session management.

Persistent - Software Engineer

Pune

08/2022 - 08/2023

- Created UI design with Next.js for multi-tenant web-based project.
- Engineered end-to-end frontend for map integration and responsive web pages.
- Integrated chat messaging functionality using SignalR to enhance user interaction.
- Acquired hands-on expertise in Angular for clustered platform integration.
- Developed and maintained backend services using Node.js, implementing RESTful APIs, efficient database connectivity, and optimized queries to ensure a scalable and well-structured architecture.

Persosistent - Academic Intern

Pune

02/2022 - 08/2022

MY PORTFOLIO

- <https://arnabghosh-portfolio.vercel.app/>

CORE EXPERTIES

- React
- Angular
- Next.js
- Node Js
- SQL
- MongoDB
- TypeScript

PROJECTS

Ococonnect Multitenant Website

Language: React, Nextjs, PostgreSQL, SignalR

Description:

- Developed a scalable and modular Admin Management System with structured workflows, role-based access control, and intuitive user interfaces.
- Engineered a real-time chat application using SignalR, leveraging full-duplex communication and WebSocket technology for instant message delivery.
- Ensured accessibility, responsiveness, and maintainability across both applications by following modern development best practices.

Polymer Cluster

Language: Nextjs, TypeScript, PostgreSQL

Description:

- Built map integration modules with structured data processing and seamless location-based interactions.
- Designed and implemented a custom admin portal for efficient data management, workflow automation, and operational control.
- Developed scalable administrative tools to manage application data fluently while maintaining data integrity and usability.

Mountain Trade Network

Language: Angular, Node.JS, TypeScript, PostgreSQL

Description:

- Developed a structured Event Management System with modular architecture, supporting event creation, scheduling, user participation, and seamless data management workflows.
- Built a real-time chat application using modern communication protocols, enabling instant messaging with low latency and efficient bidirectional data exchange.
