OPERATING SYSTEM

- Windows
- Linux
- React
- Angular
- Swagger and Postman
- Grafana, Antigravity and Visual Studio

I'm interested in learning new technologies quickly and deeply. I always strive to learn something at the core of each and every new technology with practical exploration and theoretical analysis. I am eager to provide solutions to complex problems by assessing the situation and going as far as possible.

EXPERIENCE

2024-09 -
Current

Junior Software Engineer

Sentientgeeks, Kolkata

- Created UI design with Next.js for multi-tenant web-based project.
- Engineered end-to-end frontend for map integration and responsive web pages.
- Integrated chat messaging functionality using SignalR to enhance user interaction.
- Acquired hands-on expertise in Angular for event-based platform integration.
- Explored Node.js and databases to establish fully cyclic process integration.

2024-02 -
2024-08

Intern

Sentientgeeks, Kolkata

2022-07 -
2023-12

Associate Engineer

Persistent, Pune

- Developed Multi Cloud SaaS Platform using Java SpringBoot, enhancing software functionality.
- Created IAM service with Spring Security and JWT Token for secure access control.
- Handled Java code, checked logs in Grafana, and managed Sendgrid email templates.
- Conducted API testing with Swagger and Newman to ensure performance standards.

Implemented REST API for IAM creation, ensuring robust database connectivity.

2022-02 -
2022-06

Academic Intern

Persistent, Pune

EDUCATION

General: Matriculation

*Ramakrishna Vivekananda Mission - Barrackpore,
West Bengal*

GPA: 88%

Higher Secondary: Science

*Ramakrishna Vivekananda Mission - Barrackpore,
West Bengal*

GPA: 76.2%

2022-06

B.Tech: Computer Science Engineering

JIS College of Engineering - Kalyani, WB

GPA: 8.53

Projects

Gateway OCO CONNECT

- Developed UI layouts and reusable components with proper data binding using React and Next.js.
- Built a custom admin panel to efficiently manage all public-facing sites.
- Created a custom real-time chat application using SignalR for seamless communication.

POLYMER CLUSTER

- Implemented map-based clustering features using Next.js
- Built a complete end-to-end design + frontend development for the website with robust filtering and accurate data binding.

Mountain Trade Network

- Translated Figma design layouts into responsive UIs using Tailwind CSS and Next.js.
- Managed data binding and API integrations with secure role-based access control.
- Implemented fully dynamic page creation ui through a custom admin panel.
- Developed a custom real-time chat application using SignalR.
- Performed comprehensive debugging and resolved issues across the entire website.
